

The Risks:

More than 110 million people in the United States are currently living with an STD.

Each year an additional 20 million people (over 50,000 a day!) become infected with an STD. Many of these will be lifelong infections.

Estimated number of new cases annually:

| | |
|-----------------------------------|---------------------------------|
| Chlamydia | 2.86 million⁺ |
| Genital Herpes | 776,000⁺ |
| Gonorrhea | 820,000⁺ |
| Hepatitis B | 21,900⁺ |
| HIV (virus causing AIDS) | 37,600⁺ |
| Human Papillomavirus (HPV) | 14 million⁺ |
| Syphilis | 27,814¹ |
| Trichomoniasis | 3.7 million² |

1. The number of reported primary and secondary (P&S) syphilis infections
2. The estimated number of people with the infection

To figure your risk of exposure to HIV or other Sexually Transmitted Diseases, write in the box below the total number of sexual partners

You have had:

(See inside for Risk Factor)

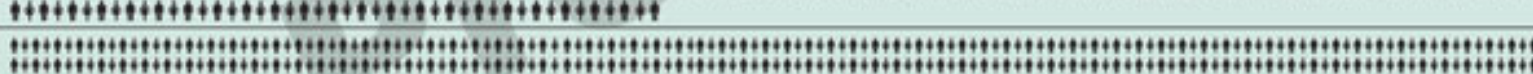

SEXUAL EXPOSURE CHART

Number of Sexual Partners

(if every person has only the same number of partners as you)

Number of People Exposed to

| | | |
|----|--|------|
| 1 |  | 1 |
| 2 |  | 3 |
| 3 |  | 7 |
| 4 |  | 15 |
| 5 |  | 31 |
| 6 |  | 63 |
| 7 |  | 127 |
| 8 |  | 255 |
| 9 |  | 511 |
| 10 |  | 1023 |
| 11 |  | 2047 |
| 12 |  | 4095 |

"When you have sex with someone, you are having sex with everyone they have had sex with for the last ten years, and everyone they and their partners have had sex with for the last ten years."

C. Everett Koop, M.D., Former U.S. Surgeon General

"Many teenagers, as well as adults, are indirectly exposed to more than one sexual partner each year because their partner has had sex with someone else."

Alan Guttmacher Institute
